Taha Farooq

AI Engineer

◊ 03024922207 ◊ tahafarooq0207@gmail.com ◊ LinkedIn ◊ GitHub

OBJECTIVE

AI Engineer with strong expertise in **machine learning, deep learning, NLP, computer vision, Retrieval-Augmented Generation (RAG), and fine-tuning Large Language Models (LLMs)**. Built impactful AI solutions including **UrduGest** for the hearing-impaired community and **Emergency Index 1122** for multilingual emergency call classification. Proficient in **Python, data analysis, model deployment, and applied AI research**, with proven **teamwork and leadership skills**, driven to design **scalable, reliable, and innovative AI systems**.

SKILLS

- **Programming:** Python, C++, Java, SQL, JavaScript
- **Backend & Frontend:** FastAPI, Django, Node.js, React
- **Frameworks & Libraries:** Scikit-learn, TensorFlow, PyTorch
- **AI & Machine Learning:** Supervised & Unsupervised Learning, Deep Learning, NLP, Transformers, Generative AI, Retrieval-Augmented Generation (RAG), Large Language Models (LLMs)
- **APIs & Tools:** Google APIs, RESTful APIs
- **Soft Skills:** Problem Solving, Team Collaboration, Project Management, Leadership

EXPERIENCE

Machine Learning Internship May 2024 - Aug 2024

Knowledge Pearls. *Remote*

- Developed ML models with TensorFlow, Keras, achieving high accuracy
- Preprocessed data for improved model performance
- Deployed models on Web GUI using Streamlit

Junior AI Developer (Intern) Jan 2026 – March 2026*

The Nixus, National Aerospace Science and Technology Park (NASTP), Islamabad · On-site

- Assisted in the development and deployment of **AI and machine learning solutions**, contributing to **data preprocessing, model training, and performance evaluation**. Supported the **integration of trained models into applications and APIs**, while actively learning and applying **modern AI/ML frameworks, tools, and best practices** in a collaborative research-driven environment.

PROJECTS

- **Urdu Sign Language Recognition.** Developed a real-time Urdu Sign Language recognition system using Mediapipe and CNNs, aimed at improving accessibility for the hearing-impaired community.
- **License Plate Recognition.** Developed a system using image processing and deep learning to detect and recognize license plates.
- **Tweet Sentiment Analysis.** Conducted sentiment analysis on tweets using natural language processing methods.
- **Data Mining on Sales Dataset.** Analyzed a sales dataset using various data mining techniques to extract valuable insights.
- **Emergency Detection System (1122)**: An AI-powered system using machine learning and Google APIs to classify emergency calls and generate tailored response plans. It enhances decision-making, improves response times, and optimizes resource allocation to save lives.

EDUCATION

Bachelor of Artificial Intelligence, NUML Islamabad Sep 2021 – July 2025

CGPA: 3.30

Courses: AI, Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Generative AI
